

Thousands of businesses around the world use FilesAnywhere to store, access, and share data online from any device with a web browser. To insure maximum protection, we deploy a blend of security measures to achieve the greatest overall data safety.

How our security works

Contact Us:
Toll-Free: 1-855-796-2669
Main: 1-469-200-0089

Compliance:
HIPAA, SOX, PCI, GLBA,
ISO-27002, SAS-70

Security Benefits

Data Encryption

All data transfer sessions use SSL encryption

128 bit SSL, 256 bit SSL, SFTP, SSSH-2, SSL 3.1 TLS Encryption

Data Encryption at Rest

AES data encryption at rest for corporate accounts. **

Advanced Password Protection

Custom password life cycle*
Custom password strength requirements*

Shared Access Control

Folder/File level permissions
Grant access to groups, users, or guests

Administrative Auditing and Reporting

Account overview
Access and usage metrics
Automated email reports

Global Security Policy

Administrators can set customized security settings for all users*

Unauthorized Access Prevention

IP authentication*
Brute force attack prevention*

Data Center Monitoring

Our data center is monitored 24/7/365 by trained experts in a state-of-the-art facility

* Requires private or dedicated accounts.

** Isilon proprietary storage cluster data encryption is standard. AES 256-bit encryption is available with the CoolBackup client software, and as an upgrade for corporate accounts.

Security Overview
